Mumbai, India

Summary

Final-year Computer Engineering undergraduate (B.E,2023-2027) with hands-on experience building full-stack web applications, Android apps, and AI/ML-integrated systems. Proficient across Java/Spring Boot,MERN stack,with production experience in microservices architecture, REST APIs, and cloud deployment. Smart India Hackathon 2025 Waitlist Finalist. Seeking a Full Stack / Android Developer internship to apply and grow technical expertise in a professional engineering environment.

Education

Terna Engineering College, Mumbai University
Bachelor of Engineering (B.E.) in Computer Engineering

Mumbai, India
2023 – 2027 (Expected)

Technical Skills

Languages: Java, Python, C, JavaScript, SQL, Kotlin
Backend & Frameworks: Spring Boot, REST APIs, Node.js, Express.js, Flask, Microservices
Frontend: React, Next.js, React Native, Jetpack Compose, HTML, CSS
Databases: MySQL, PostgreSQL, MongoDB, Firebase, Redis
Tools & Cloud: Docker, RabbitMQ, Git/GitHub, Vercel, Maven, JUnit 5, Mockito
AI/ML: Gemini API, LLM Integration, NLP (Stanza), ML Model Deployment

Projects

- CtrlAI – AI SaaS Platform** | *Full Stack, AI Integration* | ctrl-ai-alpha.vercel.app Dec 2025 – Jan 2026
- Built a full-stack AI SaaS application with user authentication and premium subscription features
 - Implemented AI-powered image processing and resume analysis tools alongside community interaction features
 - Deployed the platform on Vercel for production access
- StreamWave** | *Redis, PostgreSQL, MongoDB, Node.js, React* | [Live Demo](#) Feb 2026 – May 2026
- Building a full-stack music streaming platform supporting real-time audio streaming, user authentication, and playlist management
 - Designed a polyglot persistence layer combining PostgreSQL, MongoDB, and Redis for relational data, content metadata, and caching respectively
- IronMind – Android Fitness App** | *Kotlin, Jetpack Compose, Room, Hilt, Gemini AI* | [Live Demo](#) April 2026
- Developed a native Android fitness tracking app using Jetpack Compose for UI and Room for local persistence, following MVVM architecture with Hilt for dependency injection
 - Integrated Gemini AI to power personalized workout and nutrition recommendations within the app
- ISL Translator (SpeakSign)** | *Python, Flask, Stanza NLP, WebGL* | [Live Demo](#) Jan 2026 – May 2026
- Built a real-time English-to-Indian Sign Language translator using Stanza NLP for grammar reordering (SVO to SOV) across an 800+ sign SiGML lexicon
 - Rendered translated signs via a CWASA WebGL 3D avatar, with voice input support for accessibility
- QChat – Real-Time Chat Application** | *MERN Stack, Socket.io* | qchat12.vercel.app Sep 2025 – Dec 2025
- Built a real-time chat application supporting instant messaging, user authentication, and media sharing using the MERN stack and Socket.io

Professional Experience

- Deloitte Technology Job Simulation** Virtual
Forage Virtual Experience Program Feb 2026
- Completed a hands-on virtual job simulation covering coding and software development tasks modeled on real Deloitte technology consulting work

Extracurricular Activities

- Smart India Hackathon 2025 – Waitlist Finalist** Government of India
Developed an AI-powered Groundwater Monitoring System Oct 2025

Certifications

Machine Learning Specialization (DeepLearning.AI & Stanford Online, via Coursera) – Three-course program covering supervised learning (linear/logistic regression, neural networks, decision trees), unsupervised learning (clustering, anomaly detection), recommender systems, and reinforcement learning, with applied best practices for building and evaluating ML models

Learn Spring Boot in 100 Steps – Beginner to Expert (Packt, via Coursera) – Spring Boot Foundations, REST APIs, JPA, Spring Security, Testing

Google AI Professional Certificate (Coursera) – 7-course program covering AI for Research, Writing, Content Creation, Data Analysis, and App Building

MERN Stack Web Development (Udemy)
